

919

Bacterial Treatment Block

Reduces Hydrogen Sulfide & Grease Buildup and Breaks Down Odors & Grease Compounds in Lift Stations, Scum Pits, Grease Traps, Drain Lines and Sewage Injection Pits.

Precautions: KEEP OUT OF REACH OF CHILDREN. Do not take internally. Avoid contact with skin and eyes. Wear rubber gloves when using this product. Wash thoroughly after handling. This product may not be effective in the presence of chemical sanitizers such as formaldehyde or chlorinated bleach.

Storage: In a cool dry place away from strong acids.

Instructions: Remove the 919 from its plastic casing. Suspend 919 into the lift station extending its rope so that the 919 is submerged in water at all times. The brick will dissolve gradually over a three to five week period allowing for continuous treatment of waste. Attach a new block whenever the previous block has dissolved.
