

**NEW**  
AgraLawn  
**CRABGRASS  
KILLER**

**KILLS EXISTING CRABGRASS**  
without harming St. Augustine, Bahia,  
Common Bermuda & Centipede

USE ON: ● Crabgrass (Hairy)

- Crabgrass (Smooth)
- Basketgrass
- Chickweed
- Clover
- And other similar weeds

2 lbs (.91kg)

**KILLS the ROOTS**

**FOR USE ON:** St. Augustine  
Common Bermuda  
Bahia  
Centipede (see directions for use)

When used properly, this product will cause very little reaction or yellowing to St. Augustine, Common Bermuda, Bahia & Centipede lawns. This product is taken in through the leaves to kill existing weed and roots.

**DIRECTIONS FOR USE:**

This CRABGRASS KILLER works best when applied to wet grass/weed. You can wet the affected area with a hose, irrigation, spray bottle or apply product immediately AFTER rain.

Apply only to the affected area being careful to dust ALL of the target weed, product is known to control (see list). This product will turn from a white to a bright yellow to indicate adequate moisture when applied. If the product has not turned yellow it is not activated. A light to medium coating applied in even strokes will work best. Noticeable results will be seen in 2 to 4 days. Do not apply if rain is forecasted for several days or prior to watering the lawn to avoid washing away product. Reapply as needed.

Note for Common Bermuda & Bahia - Do not use when turf is dormant or below 60°

**COVERAGE:** 100 - 200 square feet of target weeds

**CAUTION:** MAY STAIN CONCRETE. KEEP OUT OF REACH OF CHILDREN AND ANIMALS.
